EDUCATION

Harvey Mudd College

Claremont, CA

Bachelor of Science, Engineering

May 2029

- Dean's List Recipient: Spring 2026
- **Relevant Coursework:** *Digital Electronics & Comp. Engineering, Engr. Design & Manufacturing, Materials Engineering, Engineering Systems, Multivariable Calculus, Linear Algebra, Introduction to Computer Science*

RELATED EXPERIENCE

Undergraduate Researcher, Bahena Desalination & Water Reuse Lab, Harvey Mudd College September 2026 - Present

- Build improvements into the bench-scale water treatment system; modify components and instrumentation setup to optimize data quality and system performance
- Review literature on reverse osmosis (RO) membrane performance and pre-treatment strategies for power-sector wastewater applications

Part Recovery (Client-Sponsored Design Project), Harvey Mudd College February 2026 - May 2026

- Designed and executed a project that optimized and streamlined the extraction process of b-nuts and sleeves from flared tube assemblies, reducing cycle time per unit by 82.5% within strict time and budget parameters
- Conducted 12+ design iterations in SolidWorks and machined prototypes using a manual lathe, mill, bandsaw, and sandblaster to develop a fixture and handle assembly that secures tubing during extraction to reduce handling risk
- Produced technical drawings, developed Bill of Materials (BOM), and wrote process routers for client to reproduce to support and improve manufacturing workflows

Introduction to Autonomous Vehicles, UC San Diego COSMOS July 2024 - August 2024

- Developed a fully autonomous vehicle from scratch under Prof. Jack Silberman
- Engineered a computer vision system using OpenCV, Roboflow, and NVIDIA Jetson Nano with ROS, training a Python image recognition model that identified red and green traffic lights with 99% accuracy
- Modeled custom CAD components in Onshape and fabricated parts via 3D printing and laser cutting
- Delivered a technical presentation on AI ethics to industry professionals and a crowd of 30+

WORK EXPERIENCE

Teaching Assistant & Grader (Intro to CS), Harvey Mudd College September 2026 - Present

- Lead weekly lab hours, assisting students with programming, debugging, and other course concepts to foster a strong understanding of course material
- Grade assignments and design projects, providing detailed feedback on structure, creativity, and technical accuracy

Teaching Intern, Project Think June 2026 - July 2026

- Spearheaded and successfully executed two summer curriculums for 150+ students while managing 3-5 volunteers on data visualization (ArcGIS StoryMaps) and 3D CAD design
- Adapted lesson plans and technical explanations for students with skill levels spanning a 5-year range, guiding 100% of students from concept to a final deliverable

LEADERSHIP

Logistics & Events Lead, Harvey Mudd Racing (Formula SAE) August 2025 - Present

- Lead logistical planning and execution for a 30+ member cross-functional team, managing budgets and coordinating professional events, networking sessions, photoshoots, and team retreats to maximize engagement and team cohesion
- Fabricate and weld chassis components using manual machining techniques for the Formula SAE competition vehicle, contributing technical expertise to engine subsystem assembly and component integration

Outreach Coordinator, Society of Women Engineers August 2025 - Present

- Build and maintain partnerships with local SWENext high school chapters, organize initiatives to increase engagement with students and local communities; coordinate with executive leadership to plan the annual WEST Conference

SKILLS

Technical: SolidWorks, Onshape, LabVIEW, SystemVerilog, Python, R, Microsoft Office Suite, HTML, CSS, ArcGIS

Fabrication: Manual Lathe, Mill, Solder, Vertical Bandsaw, MIG Welding, Circuit design, Oscilloscope, FPGA, Breadboarding
